

COORDINATION CENTER  
FOR TLD RU/PФ

# ccTLD .RU years ahead:

**New strategy of Coordination Center  
for TLDs .RU/.PФ  
2019-2021**

**12 September 2018  
Jurmala, Latvia**

1. Researches and development of authentication systems for domain registration based on united system of state services
2. New formats of data representation for registry database. It will help to manage personal information of registrants.
3. New recommendations for registrars how to collect, store and process personal data of registrants with respect to Russian national law in this area

1. Coordination Center together with Moscow Internet Exchange is to conduct the research of current security and stability status of Russian segment of Internet. The results of the research will be used for further development of DNS infrastructure

1. Further increasing the efficiency of work with Competent organizations aimed to speed up the process of domain monitoring and seizure
2. Cooperation with Russian and international cybersecurity experts to exchange best practices and experience
3. Further development of Netoscope project: new analytical tools and new researchers. It will help participants to more efficiently detect malicious domains and cybercriminals

1. Coordination Center and partners educational projects: “Study Internet – govern it!”, “Digital region”, “Territory of sense” and others.
2. Further cooperation with Russian media to increase the awareness about the internet governance principles.
3. Involving the “Youth Chapter” of Coordination Center in Internet governance initiatives.

1. Hosting international forums and conferences including national and regional IGFs, TLDCON conferences, other regional events related to internet infrastructure, digital education and cybersecurity.
2. Active participation in the events of regional domain associations of Europe and Asia Pacific region.
3. Make a possibility for Russian experts to participate more in global internet governance process
4. Represent the interests of Russian Internet community on international events.

1. Increasing the number of registrations in .RU and .PΦ zones
2. Domain price optimization
3. Optimization of secondary domain market
